

Method 1

$$ROI = \frac{\text{Net return on investment}}{\text{Cost of investment}} \times 100\%$$

Return on Equity (ROE)

$$\frac{\text{Net Income}}{\text{Average Total Equity}}$$

WHAT IS CAPITAL STRUCTURE ?

- It is a company's specific mix of debt and equity to use financial resources for its assets and growth. Finding the optimal capital structure involves balancing the tax benefit of debt with the risk of financial distress, aiming to minimize the WACC.

Capital Structure
